ASP008 – 8 channel Variable Impedance Mic Pre with 96kHz AES/ADAT option

ASP008 offers 8 channels of Audient's renowned mic pres packaged in a convenient 1U rack with digital output option for AES/ADAT. This provides the perfect upgrade for any user looking to step up to a world class quality of recording. Audient's mic pres and A/D converters bypass the mic pres and converters in your multi channel interface and bring warmth, clarity and punch to everything you record. Don't take our word for it, get down to your local dealer and ask for a demo.

It's all in the design

Audient uses a discrete Class A design to provide a low distortion, low noise front end to your system. The variable impedance switch matches ASP008 perfectly to ribbon mics, offering impedances of up 5000 ohms - and with 60dB of gain it will handle any signal you can throw at it. With more than 20 years experience in converter design, Audient's development team use the latest technology and innovative designs to make sure you get the very best from your recordings
